## Vapor Tank Enclosure

### A WIN WIN SOLUTION

#### Customer

Save 1/2 to 1/3 the cost of a Concrete Masonry Unit (CMU) enclosure.  
Reduce onsite construction activity by 1-1/2 weeks, minimum.  
Damage repair cost /time dramatically reduced.  
Easy to assimilate existing station architecture.

#### Contractor

Adds no additional inspections.  
Assembles in three hours or less.  
No special trades required.  
Durable primer finish allows immediate paint to match.

#### Supplier

Provides opportunity to save your customer money.  
Provides opportunity to increase sales.  
Local manufacture reduces shipping cost.  
5 basic components allows for easy "after the sale" service.

#### Manufacturer

Minimal number of components allows ease of manufacturing.  
Robust manufacturing facility insures product deliverability.  
CNC manufacturing processes insure consistent quality.  
ISO 9000 certification provides organizational tools to insure quality.

#### Architect/Engineer

.PDF drawings available for cut and paste.  
Engineering calculations for foundation, wind and anchoring.  
1 hour fire rated sidings available to assimilate/enhance existing architecture.

#### Building/ Fire departments

Constructed of (4) hour fire resistant materials.  
Pre-engineered and consistent construction design.  
Hides unsightly tank and piping.
